EDUCATION

BULACAN STATE UNIVERSITY – SARMIENTO CAMPUS

Aug. 2022 – Present

Bachelor of Science in Information Technology

Major in Web and Mobile Application Development

Gold Gear Awards

- Dean's List Awardee (2025, 2026)

EXPERIENCE

WEB DEVELOPER INTERN — Mary Josette Academy

Jan. 2026 – Apr. 2026

- Migrated a legacy Vanilla JS Finance Management System to the **T3 Stack**, writing a custom **ETL script** to transfer 5 years of student records from **Firestore** to **SQLite** with zero data loss.
- Built and secured finance module APIs — paginated REST endpoints with Excel export cut response time by ~60%, while **Better Auth** handled role-based access control and input validation across all student financial records.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Java, SQL
- **Frontend:** React, Next.js, Svelte, Tailwind CSS, TanStack Query, Zustand
- **Backend:** Node.js, Express.js, Nest.js, tRPC, Drizzle ORM, Better Auth
- **Databases:** PostgreSQL (Neon), SQLite (Turso), MongoDB, Firebase, Upstash Redis
- **Infrastructure & DevOps:** Linux, Git, Vercel, Docker, GitHub Actions

PROJECTS

SCHOLARLINK

Jun. 2025 – Sep. 2025

Undergraduate Capstone Project

- Led a team of 5 engineers to design and ship a full-stack scholarship and internship platform in 4 months — built with **Next.js**, **TypeScript**, and **Turso**, supporting role-based access for 5 distinct user types.
- Optimized API performance using **Upstash Redis** for server-side caching, reducing redundant DB reads by ~60% and cutting average response time from ~400ms to under 160ms.

SJDM CHRISTIAN MINISTRY RMS

Apr. 2025 – May. 2025

- Developed a responsive Resource Management System for a non-profit organization using the **T3 Stack (Next.js, TypeScript, Tailwind CSS)**, delivering a fully functional client-facing interface within a 2-month timeline as part of a team of 4 engineers.
- Implemented end-to-end type-safe communication using **tRPC** and **Drizzle ORM** with **LibSQL**, eliminating runtime type errors across core resource management workflows.

PLANTARIA

Oct. 2024

PSITE RAITE 2024 Hackathon

- Built the frontend of a Web3 urban farming platform as part of a team of 5 engineers under hackathon conditions using **React.js**, **Tailwind CSS**, and **ICP Azle** — delivering a responsive, beginner-friendly UI within a single-day sprint.
- Abstracted complex **Web3** interactions into a clean, accessible interface for non-technical users, covering tutorial discovery and step-by-step farming guides.

CERTIFICATIONS & INVOLVEMENTS

International Research Conference on IT Education (IRCITE)

Apr. 2025

11th TOPCIT Philippines

Nov. 2024

- Achieved a score of 153, above the national average of 152; ranked 8th among 150 participants at BulSU – Sarmiento Campus.
