EDUCATION

BULACAN STATE UNIVERSITY – SARMIENTO CAMPUS

Aug. 2022 – Jun. 2026

Bachelor of Science in Information Technology

Major in Web and Mobile Application Development

Magna Cum Laude

Gold Gear Awards

- 2x Dean's List Awardee (2025, 2026)

EXPERIENCE

WEB DEVELOPER INTERN — Mary Josette Academy

Jan. 2026 – Apr. 2026

- Migrated a legacy Vanilla JS Finance Management System to the **T3 Stack**, successfully transferring **5 years of student financial data** with **zero data loss** using a custom **ETL pipeline**.
- Designed and optimized **tRPC procedures** with pagination and Excel export, reducing response time by ~ **60%**, improving user experience and system responsiveness during peak usage.
- Implemented secure authentication and **role-based access control (RBAC)** using Better Auth to protect sensitive financial data.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Java, SQL
- **Frontend:** React, Next.js, Svelte, Tailwind CSS, TanStack Query, Zustand
- **Backend:** Node.js, Express.js, Nest.js, tRPC, Drizzle ORM, Better Auth
- **Databases:** PostgreSQL (Neon), SQLite (Turso), MongoDB, Firebase, Upstash Redis
- **Infrastructure & DevOps:** Linux, Git, Vercel, Docker, GitHub Actions

PROJECTS

SCHOLARLINK

Jun. 2025 – Sep. 2025

Undergraduate Capstone Project

- Led a 5-member team to build a full-stack scholarship platform supporting 5 user roles and handling multi-step approval workflows for student applications, enabling secure application and approval workflows using **Next.js**, **TypeScript**, **tRPC**.
- Improved API performance by implementing **Upstash Redis** caching, reducing response time from ~**400ms** to **<160ms** (~**60% improvement**) and enhancing system responsiveness.

SJDM CHRISTIAN MINISTRY RMS

Apr. 2025 – May. 2025

- Built a responsive Resource Management System for a non-profit organization using **T3 Stack** (Next.js, TypeScript, Tailwind CSS), delivering a fully functional client-facing interface within a **2-month timeline** as part of a team of 4 engineers.
- Implemented end-to-end type-safe communication using **tRPC** and **Drizzle ORM** with **LibSQL**, eliminating runtime type errors across core resource management workflows.

PLANTARIA

Oct. 2024

PSITE RAITE 2024 Hackathon

- Built the frontend of a Web3 urban farming platform as part of a team of 5 engineers under hackathon conditions using **React.js**, **Tailwind CSS**, and **ICP Azle** — delivering a responsive, beginner-friendly UI.
- Abstracted complex **Web3** interactions into a clean, accessible interface for non-technical users, including tutorial discovery and step-by-step farming guides.

CERTIFICATIONS & INVOLVEMENTS

International Research Conference on IT Education (IRCITE)

Apr. 2025

11th TOPCIT Philippines

Nov. 2024

- Achieved a score of 153, above the national average of 152; ranked **8th** among 150 participants at BulSU – Sarmiento Campus.
